

PRATHMESH GADE

Data Analyst | Research Analyst

+91 7249806150 | Prathamesh.gade1807@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented Research Analyst with hands-on experience turning large, complex datasets into clear, decision-ready business insights for government-funded infrastructure and renewable-energy programs (MSEDCL, MEDA, MTSKPY schemes). Proficient in data collection, cleaning, exploratory data analysis, statistical analysis, and dashboard reporting using Excel, and Power BI, with additional exposure to machine learning fundamentals. Skilled at stakeholder communication, MIS reporting, and translating operational and IoT data into actionable recommendations for cross-functional and client-facing teams. Seeking to bring strong analytical rigor, research methodology, and client-ready reporting to a Data Analyst or Research Analyst role at a global analytics' /consulting organization.

CORE SKILLS

Data Analyst & Data Scientist: Data Collection, Data Cleaning, Data Exploration, Data Visualization, Statistical Analysis, SQL Queries, Excel, Power BI, Research & Reporting, Market & Secondary Research, MIS Reporting, KPI Tracking, Business Insights.

Programming & libraries: Python, SQL, Machine Learning, Artificial Intelligence, Pandas, NumPy, scikit-learn, PyTorch, TensorFlow, Keras, Etc.

Tools & Platforms: Power BI, MySQL, Advanced Excel (Pivot Tables, VLOOKUP, Formulas), Jupyter Notebook, VS Code, JIRA, GitHub, MATLAB

Core Concepts: Data Structures, DBMS, Operating Systems, Machine Learning, Deep Learning, Computer Networking

Domain Expertise: Renewable Energy & Solar Market Analytics, Government Infrastructure Projects, Remote Monitoring System (RMS) Data, Technology & AI, Solar Policy & Regulatory Research.

Professional Skills: Stakeholder Communication, Client-Ready Reporting, Cross-Functional Collaboration, Problem Solving, Attention to Detail, Time Management

PROFESSIONAL EXPERIENCE

R&D Engineer | *Span Pumps Pvt. Ltd., Pune*

Sep 2025 - Present

- Analyze and maintain master datasets and Power BI dashboards tracking real-time status of government-funded solar pump projects under MSEDCL, MEDA, and MTSKPY schemes for stakeholder and government review.
- Monitor and interpret performance data from Remote Monitoring System (RMS)-connected solar pump controllers, consolidating field data into clear, decision-ready summaries.
- Track and analyze M2M SIM connectivity data across a large deployed device fleet, identifying communication gaps between solar controllers and monitoring servers.
- Coordinate field-to-report data flows during installation, testing, and RMS troubleshooting, and present findings to R&D and government stakeholders.

Data Analyst Intern | *Gateway Software Pvt. Ltd., Kharadi, Pune*

Jan 2025 - Jul 2025

- Performed end-to-end data analysis - collection, cleaning, and wrangling - on raw datasets using Excel, SQL, and Python to ensure data accuracy and integrity.
- Conducted exploratory data analysis (EDA) and statistical analysis to identify trends, patterns, and anomalies, translating findings into actionable business insights.
- Built and maintained interactive dashboards and reports to track key performance indicators (KPIs), enabling data-driven decision-making for stakeholders.
- Collaborated cross-functionally to define reporting requirements, interpret datasets, and present clear summaries to non-technical stakeholders.
- Documented data analysis workflows and maintained data quality standards to support consistent, repeatable reporting.

PROJECTS

Sales Performance Analysis Dashboard | Jun 2025

- Performed end-to-end analysis on a retail sales dataset using Python (Pandas, NumPy) and SQL, including data cleaning, wrangling, and EDA to uncover revenue trends and customer patterns.
- Designed an interactive Power BI dashboard with KPIs (revenue, growth rate, top-performing products/regions) to support data-driven business decisions.
- Applied statistical analysis to identify seasonal trends and outliers, presenting findings as clear, actionable insights for stakeholders.

Renewable Energy Solar Market Analysis | Apr 2025

- Built an end-to-end data analytics project analyzing India's renewable energy and solar power market using Microsoft Excel and Power BI.
- Transformed raw renewable-energy datasets into an interactive business intelligence dashboard covering installed capacity, market growth, and state-wise performance.

Face Mask Detection — Capstone Project | Mar 2025

- Built a face mask detection system using convolutional neural networks (CNN) to accurately identify mask usage in real-time video streams.
- Used Python, machine learning and deep learning workflows, and SQL databases; worked with Keras, scikit-learn, TensorFlow, PyTorch, Pandas, and MATLAB.

Wireless Electric Vehicle Charging Infrastructure Using Solar System | Feb 2025

- Developed a wireless EV charging system using transmitting coils and a solar panel, applying renewable-energy research methodology.

EDUCATION

Data Analytics and Data Science with Generative AI Course Fusion Software Institute, Pune, Maharashtra	2025 - 2026
Bachelor of Engineering - Electronics and Telecommunication, SPPU Smt. Kashibai Navale College of Engineering, Pune CGPA: 7.16	2022 - 2025
Diploma - Computer Technology, MSBTE Sou. Venutai Chavan Polytechnic 83.37%	2019 - 2022
